NEONATAL INTENSIVE CARE INCUBATOR INC 200

ROBUST • RELIABLE • USER-FRIENDLY

CE 0123

PHOENIX
enabling life

STURDY construction STABLE environment

The **PHOENIX INC 200** has been specially designed to provide the safest and most stable environment for the critical neonate. With a wide range of accessories, it can be tailored to meet any situation arising in the care of the infant.

This incubator provides the caregiver excellent access to the infant. It is user friendly, and its operation is safe and reliable. These features, the ease with which the INC 200 may be cleaned and its sturdy construction make it a vital part of the equipment in the NICU.

Motorized Trendelenburg positioning

The canopy may be opened easily at the top or from the sides. The side walls open downwards using a unique mechanism that requires relatively small clearances at the sides of the incubator. This space-saving feature also means that it is easier to place the baby in the incubator or to remove it from within.

The bed in the incubator slides out conveniently for placing the baby inside or for removal. The bed can also be rotated simultaneously for intubation or other procedures.
